

# Term 1 Week 4 2013

# TRANSITION

As part of the media exploration we have mixed colours: blue and yellow, to find out how colours are made up. Joshua asked what if we put blue in to the green. So we did that bit-by-bit and it got darker and darker. So we worked out that is how to make shades of a colour.

The children have now settled in well to the year as they are becoming familiar with the routine and each other. There is a lot of conversation between them, especially in the sandpit and cooking areas. This play is very important because they get to re-live their life experiences and put expression to it while they also explore language and develop speech. They also explore possibilities and develop their social skills and connections.
